

Plant Information

Common Name: Baby Blue Eyes

Scientific Name: Nemophila

Plant Type: Annuals

Physical Characteristics

Height/Spread: 20-30 cm tall, 10-15 cm wide

Growth Rate: Fast

Flower Color(s): Blue, white

Foliage Color(s): Green

Bloom Time: Spring

Plant Description

Nemophila, commonly known as Baby Blue Eyes, is a charming annual plant with delicate blue and white flowers that bloom in the spring. This low-maintenance beauty thrives in well-draining soil and moderate watering conditions. Its fast growth rate and compact size make it perfect for borders, containers, or ground cover. Baby Blue Eyes is also drought-tolerant and attracts pollinators to the garden. With its colorful blooms and easy care requirements, Nemophila is an excellent choice for adding a touch of soft beauty to any garden landscape.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Loamy, well-draining soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-10

Maintenance & Care

Maintenance Level: Low

Potential Pests & Diseases: Susceptible to aphids and powdery mildew

Additional Information

Special Features: Drought-tolerant, attracts pollinators

Common Uses: Ideal for borders, containers, or ground cover
