

Plant Information

Common Name: Babys Breath
Scientific Name: Gypsophila
Plant Type: Perennials

Physical Characteristics

Height/Spread: 30-90 cm tall, 30-60 cm wide
Growth Rate: Moderate
Flower Color(s): White
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Gypsophila, commonly known as Baby's Breath, is a delicate perennial plant with clusters of tiny white flowers that add a soft and airy touch to gardens. This plant thrives in full sun and well-draining soil, making it a low-maintenance addition to landscaping. Baby's Breath is drought-tolerant and can be used as a border plant or in floral arrangements. Be mindful of powdery mildew as a potential threat. Pairing Baby's Breath with roses, lavender, or salvia can create a beautiful and harmonious garden display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining soil

Water: Low to moderate watering

Hardiness Zone(s): Zone 3-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to powdery mildew

Additional Information

Special Features: Drought-tolerant, delicate appearance
