Plant Description

Snapdragons, also known as Snaps, are delightful annual flowers that add vibrant color to gardens and landscapes. These beautiful plants produce stunning, colorful blooms in various hues, attracting pollinators like hummingbirds and butterflies. Snapdragons are easy to grow, requiring moderate watering and full sun to part shade. With their unique snap-like flowers and fragrant scent, they make lovely additions to borders, containers, or cutting gardens. Additionally, Snapdragon's low maintenance level makes them perfect for beginner gardeners looking to add a pop of color to their outdoor space. Consider planting them alongside marigolds, petunias, or dahlias for a stunning floral display.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zone 7-10

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Aphids, rust, powdery mildew
