

## Plant Information

Common Name: Anemone Honorine Jobert  
Scientific Name: Anemone x hybrida 'Honorine Jobert'  
Plant Type: Perennials

## Physical Characteristics

Height/Spread: Height of 60-90 cm, Spread of 30-45 cm  
Growth Rate: Moderate  
Flower Color(s): White  
Foliage Color(s): Dark green  
Bloom Time: Late Summer to Early Fall

## Plant Description

Anemone Honorine Jobert is a stunning perennial plant known for its elegant white flowers that bloom from late summer to early fall. With a moderate growth rate, this plant thrives in part shade to full shade environments and requires moderate watering. Its dark green foliage provides a beautiful contrast to the white blooms, making it a striking addition to borders and woodland gardens. Anemone Honorine Jobert is low-maintenance and attracts butterflies, adding a touch of nature to any garden. Pair it with companions like Astilbe, Hosta, and Heuchera for a harmonious landscape design.

## Optimal Growing Requirements

Sun: Part Shade to Full Shade

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 4-8

## Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Can be affected by powdery mildew

## Additional Information

Special Features: Long-lasting blooms, attracts butterflies  
Common Uses: Borders, woodland gardens
