Scientific Name: Hibiscus syriacus 'Aphrodite'  
Plant Type: Shrub

### Physical Characteristics

Height/Spread: 2-3 meters tall and 1.5-2 meters wide  
Growth Rate: Moderate  
Flower Color(s): Bright pink  
Foliage Color(s): Green  
Bloom Time: Summer to early fall

### Plant Description

Hibiscus s Aphrodite, also known as Aphrodite hibiscus, is a stunning shrub with bright pink flowers that bloom from summer to early fall. This low-maintenance plant thrives in full sun and moderate watering, making it an excellent choice for hedges or as a specimen plant in gardens. It is drought-tolerant and attracts butterflies, adding beauty and wildlife to any landscape. With its green foliage and moderate growth rate, this shrub is a colorful addition to gardens in hardiness zones 5-9. Pair it with butterfly bush or lavender for a beautiful garden display.

### Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 5-9

### Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Aphids, spider mites, scale insects

### Additional Information

Special Features: Drought-tolerant, attracts butterflies  
Common Uses: Hedge, specimen plant

### Notes
