

Plant Information

Common Name: Aster n-b Marie Ballard
Scientific Name: Aster novi-belgii 'Marie Ballard'
Plant Type: Perennials

Physical Characteristics

Height/Spread: 60-80 cm (height), 30-45 cm (spread)
Growth Rate: Moderate
Flower Color(s): Purple
Foliage Color(s): Green
Bloom Time: Late Summer to Fall

Plant Description

Aster n-b Marie Ballard is a lovely perennial plant that blooms in late summer to fall with vibrant purple flowers that attract butterflies and bees. This low-maintenance plant thrives in full sun and moderate watering conditions, making it a great choice for borders, containers, and pollinator gardens. With its green foliage and moderate growth rate, Aster n-b Marie Ballard adds a pop of color to any garden setting. This perennial is hardy in zones 4-8 and can be paired with companion plants like Shasta daisies, Black-eyed Susans, and Russian sage for a beautiful landscape display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining soil

Water: Moderate Watering

Hardiness Zone(s): Zones 4-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to powdery mildew

Additional Information

Special Features: Attracts butterflies and bees
Common Uses: Borders, containers, pollinator gardens
