

## Plant Information

Common Name: Autumn Blaze Maple  
Scientific Name: *Acer x freemanii* 'Autumn Blaze'  
Plant Type: Tree

## Physical Characteristics

Height/Spread: 15-20 meters tall, with a spread of 10-15 meters  
Growth Rate: Fast  
Flower Color(s): Insignificant; small red flowers in spring  
Foliage Color(s): Bright green leaves turning to brilliant shades of orange and red in autumn  
Bloom Time: Spring

## Plant Description

Acer f Autumn Blaze, known as Autumn Blaze Maple, is a fast-growing tree prized for its stunning fall foliage. With bright green leaves that transform into fiery shades of orange and red in autumn, this tree adds a vibrant splash of color to any landscape. It thrives in full sun and well-drained soil, requiring moderate watering. Autumn Blaze Maple is low-maintenance and drought-tolerant, making it a popular choice for shade, specimen, or street tree planting. Its resilience to pests and diseases, along with its beautiful fall display, make it a beloved addition to Canadian gardens.

## Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-8

## Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Aphids, scale, tar spot, verticillium wilt

## Additional Information

Special Features: Drought-tolerant, excellent fall color  
Common Uses: Shade tree, specimen tree, street tree
