

Plant Information

Common Name: Beans
Scientific Name: Phaseolus vulgaris
Plant Type: Annuals

Physical Characteristics

Height/Spread: 0.5 - 2 meters in height, spreads up to 1 meter
Growth Rate: Moderate
Flower Color(s): White, pink, purple
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Beans are a versatile and nutritious addition to any garden. They are easy to grow and can be used as a food crop or to improve soil health through nitrogen fixation. With a moderate growth rate and low maintenance needs, beans are a great choice for beginner gardeners. They come in a variety of flower colors and can be planted alongside other vegetables like corn and cucumbers. Keep an eye out for common pests and diseases, but with proper care, beans can provide a bountiful harvest throughout the summer.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, loamy soil

Water: Moderate Watering

Hardiness Zone(s): Zones 2-5

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Common pests include aphids and spider mites; diseases can include rust and powdery mildew

Additional Information

Special Features: Highly nutritious and easy to grow; fixes nitrogen in the soil
Common Uses: Can be used as a food crop or as a nitrogen fixer in crop rotation
