

Plant Information

Common Name: Black Hollyhock
Scientific Name: *Alcea rosea* 'Nigra'
Plant Type: Perennials

Physical Characteristics

Height/Spread: 1-2 meters tall, 0.5-1 meter wide
Growth Rate: Moderate
Flower Color(s): Dark purple to black
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Alcea rosea 'Nigra', commonly known as Black Hollyhock, is a stunning perennial plant with dark purple to black flowers that bloom in the summer. It has a moderate growth rate and requires full sun and moderate watering. This plant is drought-tolerant and attracts bees and butterflies to the garden. Black Hollyhock is an excellent choice for borders or as a focal point in the garden. It pairs well with companion plants like lavender, Echinacea, and Rudbeckia. With its unique color and low maintenance requirements, *Alcea rosea* 'Nigra' is a must-have for any landscape or garden in Canada.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining soil

Water: Moderate Watering

Hardiness Zone(s): Zone 3-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to rust and spider mites

Additional Information

Special Features: Drought-tolerant, attracts bees and butterflies
Common Uses: Border plant, focal point in the garden
