

Plant Information

Common Name: Blue Chip Juniper
Scientific Name: *Juniperus horizontalis* 'Blue Chip'
Plant Type: Shrubs

Physical Characteristics

Height/Spread: 0.5 meters tall, 1 meter spread
Growth Rate: Slow
Flower Color(s): Non-flowering
Foliage Color(s): Blue-green
Bloom Time: Non-flowering

Plant Description

Juniper h Blue Chip, also known as Blue Chip Juniper, is a low-growing shrub with striking blue-green foliage. This slow-growing plant is perfect for ground cover in sunny areas, as it is drought-tolerant and requires low maintenance. Resistant to pests and diseases, this juniper is an excellent choice for rock gardens, borders, or as a container plant. Its unique color and texture make it a standout in any landscape. Pair with sedum, lavender, or ornamental grasses for a beautiful and harmonious garden design. Blue Chip Juniper is a versatile and attractive addition to any garden in Canada.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining soil

Water: Low Watering

Hardiness Zone(s): Zone 3-5

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Resistant to most pests and diseases

Additional Information

Special Features: Drought-tolerant, deer-resistant
