

Plant Information

Common Name: Blueberry
Scientific Name: Vaccinium spp.
Plant Type: Shrub

Physical Characteristics

Height/Spread: 0.5-2 meters tall, spread varies
Growth Rate: Moderate
Flower Color(s): White or pink
Foliage Color(s): Green
Bloom Time: Spring

Plant Description

Blueberries are versatile shrubs that not only provide delicious berries but also add beauty to the landscape with their spring flowers and colorful fall foliage. These low-maintenance plants thrive in acidic soil and sunny locations, making them ideal for Canadian gardens. Blueberries are not only a popular choice for home gardeners but also attract pollinators and wildlife. With proper care, these shrubs can produce bountiful harvests of sweet and nutritious berries. Whether grown for their fruit or ornamental appeal, blueberries are a fantastic addition to any garden in Canada.

Optimal Growing Requirements

Sun: Full Sun

Soil: Acidic, well-drained soil

Water: Moderate Watering

Hardiness Zone(s): Zone 3-6

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Common pests include blueberry maggot and diseases like powdery mildew

Additional Information

Special Features: Edible berries, attractive fall foliage
Common Uses: Edible fruit, ornamental shrub

Notes
