

Plant Information

Common Name: Butterscotch Bluestar
Scientific Name: Amsonia Butterscotch
Plant Type: Perennials

Physical Characteristics

Height/Spread: 60-90 cm tall, 45-60 cm wide
Growth Rate: Moderate
Flower Color(s): Butterscotch yellow
Foliage Color(s): Green
Bloom Time: Late Spring to Early Summer

Plant Description

Amsonia Butterscotch, also known as Butterscotch Bluestar, is a stunning perennial plant with clusters of butterscotch yellow flowers that bloom in late spring to early summer, adding a pop of color to the garden. Its green foliage complements the vibrant blooms, making it a striking addition to borders or mass plantings. This low-maintenance plant is drought-tolerant and deer-resistant, making it ideal for Canadian gardens. With its moderate growth rate and ability to thrive in various soil types, Amsonia Butterscotch is a versatile choice for gardeners looking to attract pollinators and add beautiful color to their landscape.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Generally pest-free, susceptible to crown rot in poorly-drained soils

Additional Information

Special Features: Drought-tolerant, deer-resistant
Common Uses: Border plant, mass planting, pollinator attractor
