

Plant Information

Common Name: Canada Gold Euonymus
Scientific Name: *Euonymus fortunei* 'Canada Gold'
Plant Type: Shrubs

Physical Characteristics

Height/Spread: 0.6-1 meter tall and 1-1.5 meters wide
Growth Rate: Moderate
Flower Color(s): Insignificant
Foliage Color(s): Bright green with gold edges
Bloom Time: Spring

Plant Description

Euonymus Canada Gold, also known as Canada Gold *Euonymus*, is a versatile evergreen shrub with bright green and gold foliage that adds color and interest to any garden. This low-maintenance plant is drought-tolerant and deer-resistant, making it perfect for busy gardeners. Its compact size and moderate growth rate make it an excellent choice for borders, edging, or ground cover. In spring, it produces inconspicuous flowers but is primarily prized for its striking foliage. *Euonymus Canada Gold* thrives in well-drained, fertile soil and prefers full sun to partial shade. Overall, it is a beautiful and reliable addition to any landscape.

Optimal Growing Requirements

Sun: Full Sun to Partial Shade

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 4-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Can be susceptible to scale insects and powdery mildew

Additional Information

Special Features: Drought-tolerant, deer-resistant
