

Plant Information

Common Name: Carrots
Scientific Name: *Daucus carota*
Plant Type: Biennial

Physical Characteristics

Height/Spread: 30-60 cm tall, 15-30 cm spread
Growth Rate: Moderate
Flower Color(s): White
Foliage Color(s): Green
Bloom Time: Spring

Plant Description

Carrots (*Daucus carota*) are biennial plants that produce crunchy, flavorful roots rich in essential vitamins and antioxidants. They thrive in full sun and moderate watering, preferring loose, well-drained soil. Carrots are easy to grow and make a nutritious addition to any garden. Common pests to watch out for include carrot rust fly and carrot weevil, along with damping-off disease. These versatile plants can be used for fresh eating, juicing, or cooking in various dishes. Consider companion planting with tomatoes, lettuce, or beans to maximize space and resources in your garden.

Optimal Growing Requirements

Sun: Full Sun

Soil: Loose, well-drained soil

Water: Moderate Watering

Hardiness Zone(s): Zones 2-10

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Carrot rust fly, carrot weevil, damping-off disease

Additional Information

Special Features: Rich in vitamins and antioxidants, easy to grow
Common Uses: Edible roots, companion planting with tomatoes, lettuce, and beans
