

Plant Information

Common Name: Celeriac
Scientific Name: *Apium graveolens* var. *rapaceum*
Plant Type: Biennial

Physical Characteristics

Height/Spread: 30-60 cm height, 20-30 cm spread
Growth Rate: Moderate
Flower Color(s): White
Foliage Color(s): Green
Bloom Time: Late summer to fall

Plant Description

Celeriac, also known as celery root, is a biennial plant with a moderate growth rate. It produces white flowers in late summer to fall and has green foliage. This plant prefers full sun to part shade and moderate watering in rich, well-draining soil. Celeriac is commonly used for its edible root, which has a nutty flavor and is popular in culinary dishes. It is low maintenance and can be grown alongside carrots, tomatoes, and onions as companion plants. Celeriac is a versatile and tasty addition to any garden or landscape in Canada.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Rich, well-draining soil

Water: Moderate Watering

Hardiness Zone(s): Zones 2-9

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Aphids, carrot rust fly, celery leaf spot

Additional Information

Special Features: Edible root, nutty flavor
Common Uses: Culinary use, edible root vegetable
