

Plant Information

Common Name: Celery
Scientific Name: *Apium graveolens*
Plant Type: Biennial

Physical Characteristics

Height/Spread: 30-60 cm tall and 20-40 cm wide
Growth Rate: Moderate
Flower Color(s): White
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Celery (*Apium graveolens*) is a biennial plant known for its crunchy texture and distinctive flavor. It is commonly used in various dishes such as salads, soups, and stews. Celery requires high water intake and full sun exposure to thrive. This vegetable is rich in essential nutrients, making it a popular choice for health-conscious individuals. In gardening, celery can be planted alongside tomatoes, beans, and onions as companion plants to enhance growth and flavor in the garden.

Optimal Growing Requirements

Sun: Full Sun

Soil: Loamy, well-draining soil

Water: High Watering

Hardiness Zone(s): Zones 2-11

Maintenance & Care

Maintenance Level: Moderate
Potential Pests & Diseases: Celery is susceptible to celery leaf spot, aphids, and celery mosaic virus.

Additional Information

Special Features: Celery is rich in vitamins and minerals and is commonly used in cooking for its crisp texture and flavor.
Common Uses: Celery is often used in salads, soups, stews, and as a garnish.

Notes
