

## Plant Information

Common Name: Clustered Bellflower  
Scientific Name: Campanula g Freya  
Plant Type: Perennial

## Physical Characteristics

Height/Spread: 30-60 cm height, 30-45 cm spread  
Growth Rate: Moderate  
Flower Color(s): Purple  
Foliage Color(s): Green  
Bloom Time: Summer

## Plant Description

Campanula g Freya, also known as Clustered Bellflower, is a charming perennial that produces clusters of bell-shaped purple flowers in the summer. With moderate growth, this low-maintenance plant is perfect for borders and rock gardens. Its green foliage complements the vibrant blooms, attracting pollinators to the garden. Able to withstand moderate watering and thrive in full sun to part shade, Clustered Bellflower is an excellent addition to any landscape. Keep an eye out for common pests like slugs and snails, as well as powdery mildew. Pair with companions like Astilbe, Geranium, and Lavender for a beautiful garden display.

## Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-draining, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-8

## Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Slugs, snails, powdery mildew

## Additional Information

Special Features: Attracts pollinators  
Common Uses: Border plant, rock gardens
