

### Plant Information

Common Name: Coneflower Tomato Soup  
Scientific Name: Echinacea purpurea Tomato Soup  
Plant Type: Perennials

### Physical Characteristics

Height/Spread: 60-90 cm tall, 30-45 cm spread  
Growth Rate: Moderate  
Flower Color(s): Deep red with orange tones  
Foliage Color(s): Dark green  
Bloom Time: Summer to Fall

### Plant Description

Echinacea purpurea 'Tomato Soup' is a striking perennial with bold, deep red flowers that bloom from summer to fall. This cone flower variety adds a vibrant pop of color to the garden and attracts butterflies with its nectar-rich blooms. With its moderate growth rate and low maintenance requirements, Echinacea 'Tomato Soup' is an excellent choice for borders or containers in sunny locations. This drought-tolerant plant thrives in well-draining soil and is best suited for hardiness zones 3-9. Pair it with companions like Black-eyed Susans or Russian Sage for a stunning garden display.

### Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zone 3-9

### Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Susceptible to aphids and powdery mildew

### Additional Information

Special Features: Drought-tolerant, attracts butterflies  
Common Uses: Borders, containers

### Notes
