

Plant Information

Common Name: Coreopsis Double the Sun
Scientific Name: Coreopsis grandiflora 'Double the Sun'
Plant Type: Perennials

Physical Characteristics

Height/Spread: 30-45 cm tall, 30-45 cm wide
Growth Rate: Moderate
Flower Color(s): Bright yellow
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Coreopsis Double the Sun is a charming perennial with double bright yellow flowers blooming in the summer. Its compact size makes it perfect for borders or containers, and its drought tolerance and attractiveness to butterflies make it a lovely addition to any garden. With low maintenance requirements and a moderate growth rate, this plant is a great choice for gardeners looking to add a splash of color and nature-friendly features to their landscape. Pair with other sun-loving blooms like Black-eyed Susans and Salvia for a stunning display of vibrant colors.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-9

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to aphids and powdery mildew

Additional Information

Special Features: Drought-tolerant, attracts butterflies
Common Uses: Ideal for borders, containers, and pollinator gardens
