

Plant Information

Common Name: Coreopsis Sunfire
Scientific Name: Coreopsis grandiflora 'Sunfire'
Plant Type: Perennial

Physical Characteristics

Height/Spread: 30-45 cm tall, 30-45 cm wide
Growth Rate: Moderate
Flower Color(s): Golden yellow with red centers
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Coreopsis Sunfire is a stunning perennial plant that brightens up any garden with its golden yellow flowers and red centers. This low-maintenance plant thrives in full sun and well-drained soil, making it perfect for borders, rock gardens, and containers. Its moderate growth rate and drought tolerance make it an excellent choice for landscaping in Canadian gardens. Coreopsis Sunfire also attracts butterflies, adding a touch of nature to your outdoor space. Pair it with companions like Salvia, Rudbeckia, and Echinacea for a beautiful and vibrant garden display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, sandy or loamy soil

Water: Low to moderate watering

Hardiness Zone(s): Zones 4-9

Maintenance & Care

Maintenance Level: Low
