

Plant Information

Common Name: Dicentra Sweet Hearts

Scientific Name: *Dicentra eximia*

Plant Type: Perennials

Physical Characteristics

Height/Spread: 30-60 cm tall, 30-45 cm wide

Growth Rate: Moderate

Flower Color(s): Pink

Foliage Color(s): Blue-green

Bloom Time: Spring to early summer

Plant Description

Dicentra Sweet Hearts, also known as Bleeding Hearts, are charming perennials that add a touch of elegance to shady gardens. With delicate pink heart-shaped flowers hanging gracefully from arching stems, they bloom from spring to early summer. Their blue-green foliage provides a beautiful contrast, making them a standout in any garden. Dicentra Sweet Hearts are low maintenance and can thrive in various soil types. Their deer resistance and ability to attract hummingbirds make them a popular choice for shaded borders and woodland gardens. Pair them with hostas, ferns, and heucheras for a stunning display in your landscape.

Optimal Growing Requirements

Sun: Part Shade to Full Shade

Soil: Rich, well-draining soil

Water: Moderate Watering

Hardiness Zone(s): Zone 3-8

Maintenance & Care

Maintenance Level: Low

Potential Pests & Diseases: Susceptible to aphids and slugs, may develop powdery mildew

Additional Information

Special Features: Deer resistant, attracts hummingbirds

Common Uses: Ideal for shaded borders, woodland gardens, and rock gardens
