

Plant Information

Common Name: Double Trouble Sneezeweed

Scientific Name: Helenium Dbl Trouble

Plant Type: Perennials

Physical Characteristics

Height/Spread: 60-90 cm tall, 30-45 cm wide

Growth Rate: Moderate

Flower Color(s): Yellow with red highlights

Foliage Color(s): Green

Bloom Time: Summer to Fall

Plant Description

Helenium Dbl Trouble, also known as Double Trouble Sneezeweed, is a stunning perennial with yellow flowers accented by red highlights. This plant blooms from summer to fall and thrives in full sun with moderate watering. Helenium Dbl Trouble is low maintenance and attracts butterflies while being resistant to deer. Its compact size makes it perfect for borders or cut flower arrangements. Pair it with companions like Echinacea and Rudbeckia for a vibrant garden display. With its unique coloration and easy care requirements, Helenium Dbl Trouble is a must-have for Canadian gardeners looking to add a pop of color to their landscape.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zone 3-7

Maintenance & Care

Maintenance Level: Low

Potential Pests & Diseases: Aphids, powdery mildew

Additional Information

Special Features: Attracts butterflies, deer resistant

Common Uses: Border plant, cut flower
