

Plant Information

Common Name: Dwarf Alberta Spruce
Scientific Name: *Picea glauca* 'Conica'
Plant Type: Tree

Physical Characteristics

Height/Spread: 2-4 meters tall, 1-2 meters wide
Growth Rate: Slow
Flower Color(s): Non-flowering
Foliage Color(s): Green
Bloom Time: Non-flowering

Plant Description

Picea a Little Gem, also known as Dwarf Alberta Spruce, is a slow-growing, compact conifer tree with a distinctive conical shape. Its green foliage and dense growth habit make it a popular choice for adding structure and visual interest to gardens and landscapes. This low-maintenance tree thrives in full sun and moderate watering conditions. While relatively pest and disease-resistant, it can be susceptible to aphids, spider mites, and rust diseases. *Picea a Little Gem* is versatile and can be used as an accent plant or specimen tree, complemented by companion plants like barberry, daylilies, and yarrow.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, loamy soil

Water: Moderate Watering

Hardiness Zone(s): Zone 2-6

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Aphids, spider mites, rust diseases

Additional Information

Special Features: Compact, conical shape
Common Uses: Accent plant, specimen tree
