

## Plant Information

Common Name: Eastern Redbud  
Scientific Name: *Cercis canadensis*  
Plant Type: Tree

## Physical Characteristics

Height/Spread: 6-9 meters tall and 5-7 meters wide  
Growth Rate: Moderate  
Flower Color(s): Pink or purple  
Foliage Color(s): Green, turning yellow in fall  
Bloom Time: Spring

## Plant Description

*Cercis can* Redbud, commonly known as Eastern Redbud, is a stunning tree known for its pink or purple blooms in spring. Its heart-shaped leaves add beauty to landscapes, turning yellow in fall. This moderate-growing tree thrives in well-drained, loamy soil and can attract pollinators like butterflies and bees. With low maintenance requirements, the Eastern Redbud is an excellent choice as an ornamental tree or specimen plant in gardens or landscapes. Pair it with companion plants like Rhododendrons, Azaleas, Hostas, and Ferns to create a beautiful and harmonious garden setting.

## Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, loamy soil

Water: Moderate Watering

Hardiness Zone(s): Zone 4-8

## Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Can be susceptible to verticillium wilt, canker diseases, and scale insects

## Additional Information

Special Features: Attracts pollinators like butterflies and bees  
Common Uses: Ornamental tree, specimen plant
