

Plant Information

Common Name: Golden Weeping Willow

Scientific Name: *Salix alba tristis*

Plant Type: Tree

Physical Characteristics

Height/Spread: 15-20 meters tall and 10-15 meters wide

Growth Rate: Fast

Flower Color(s): Yellow-green

Foliage Color(s): Bright green

Bloom Time: Spring

Plant Description

Salix alba tristis, commonly known as the Golden Weeping Willow, is a striking tree with its weeping branches and bright green foliage, adding a unique touch to any landscape. This fast-growing tree thrives in moist soil and full sun, producing yellow-green flowers in the spring. It is a low-maintenance tree that attracts birds and is resistant to deer. Perfect for wet areas, erosion control, and windbreaks, the Golden Weeping Willow is an excellent choice for gardeners looking to enhance their outdoor space with a beautiful and functional tree.

Optimal Growing Requirements

Sun: Full Sun

Soil: Moist, well-draining soil

Water: High Watering

Hardiness Zone(s): Zone 4-7

Maintenance & Care

Maintenance Level: Moderate

Potential Pests & Diseases: Susceptible to aphids and willow beetles

Additional Information

Special Features: Attracts birds, deer-resistant

Common Uses: Ideal for wet areas, erosion control, and windbreaks
