

Plant Information

Common Name: Gourds
Scientific Name: Cucurbita spp.
Plant Type: Annuals

Physical Characteristics

Height/Spread: 0.5-5 meters in height and spread
Growth Rate: Fast
Flower Color(s): Yellow
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Gourds are a versatile and easy-to-grow plant that can add a unique touch to any garden. They come in various shapes, sizes, and colors, making them a popular choice for both ornamental and culinary purposes. Gourds thrive in sunny locations with well-draining soil and moderate watering. They are fast-growing plants that bloom in the summer, attracting pollinators with their yellow flowers. Low-maintenance and drought-tolerant, gourds are a great addition to any garden or landscape. Consider planting them alongside corn, beans, and squash for a traditional Three Sisters garden.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-5

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Common pests include squash bugs and powdery mildew

Additional Information

Special Features: Drought-tolerant
Common Uses: Ornamental gourds can be used for decorations, while edible gourds can be used in cooking
