

Plant Information

Common Name: Hibiscus s Lucy
Scientific Name: Hibiscus syriacus 'Lucy'
Plant Type: Shrub

Physical Characteristics

Height/Spread: 1.5-2 meters tall and 1-1.5 meters wide
Growth Rate: Moderate
Flower Color(s): Pink with deep red eye
Foliage Color(s): Green
Bloom Time: Summer to Fall

Plant Description

Hibiscus s Lucy, also known as Hibiscus syriacus 'Lucy', is a stunning shrub that produces pink flowers with a deep red eye during the summer to fall months. This moderate-growing plant is perfect for adding color to your garden and is relatively low maintenance. With its drought-tolerant nature and ability to attract butterflies, Hibiscus s Lucy is a great addition to any landscape. Plant it as a hedge or use it as a focal point in your garden for a beautiful pop of color. Pair it with companions like Salvia, Lavender, or Coreopsis for a harmonious and vibrant garden display.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 5-9

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to aphids and spider mites

Additional Information

Special Features: Drought-tolerant, attracts butterflies
Common Uses: Ideal for hedges or as a focal point in the garden

Notes
