## Plant Description

Alcea hyb Las Vegas, commonly known as Hollyhock Las Vegas, is a stunning perennial plant that produces beautiful blooms in shades of pink, white, or red during the summer months. With a moderate growth rate, this plant thrives in full sun with moderate watering needs. Its green foliage provides a perfect backdrop for its colorful flowers, which attract butterflies and hummingbirds to the garden. Ideal for border plantings, cut flower arrangements, or cottage gardens, Hollyhock Las Vegas is a low-maintenance plant that adds charm and elegance to any outdoor space. Pair it with companions like Delphiniums, Echinacea, or Lavender for a beautiful and harmonious garden display.

## Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-9

## Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Aphids, rust, powdery mildew
