

Plant Information

Common Name: Honeysuckle
Scientific Name: *Lonicera heckrotii*
Plant Type: Vine

Physical Characteristics

Height/Spread: 2-3 meters height and 2-3 meters spread
Growth Rate: Moderate
Flower Color(s): Pink, orange, yellow
Foliage Color(s): Green
Bloom Time: Late spring to early summer

Plant Description

Lonicera heckrotii, commonly known as Honeysuckle, is a beautiful vine that produces fragrant flowers in shades of pink, orange, and yellow. It is a moderate grower that thrives in full sun to part shade conditions and requires moderate watering. This vine is perfect for climbing trellises or fences, adding a pop of color and attracting pollinators like hummingbirds. With its low maintenance requirements and unique features, *Lonicera heckrotii* is a popular choice for landscaping and gardening in Canadian climates. Pair it with companion plants like Clematis and roses to create a stunning garden display.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-draining, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 5-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Aphids, powdery mildew

Additional Information

Special Features: Fragrant flowers, attracts hummingbirds
Common Uses: Climbing vine, trellis plant

Notes
