

Plant Information

Common Name: Hydrangea
Scientific Name: Hydrangea macrophylla
Plant Type: Shrubs

Physical Characteristics

Height/Spread: 1-3 meters tall, 1-3 meters wide
Growth Rate: Moderate
Flower Color(s): Pink, blue, purple, white
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Hydrangea macrophylla, commonly known as Hydrangea, is a beautiful and versatile shrub that adds a pop of color to any garden. With its large, showy flowers that come in various shades of pink, blue, purple, and white, this plant blooms in the summer and prefers part shade. Hydrangeas are moderate growers and require moderate watering to thrive. They are best planted in well-draining, loamy soil and are suitable for hardiness zones 4-9 in Canada. Hydrangeas are loved for their ability to change flower color based on soil pH, making them a unique and eye-catching addition to any landscape. With proper care, this plant can be a stunning focal point in any garden setting.

Optimal Growing Requirements

Sun: Part shade

Soil: Well-draining, loamy soil

Water: Moderate watering

Hardiness Zone(s): Zone 4-9

Maintenance & Care

Maintenance Level: Moderate
Potential Pests & Diseases: Aphids, powdery mildew

Additional Information

Special Features: Acid-loving, can change flower color based on soil pH
Common Uses: Borders, hedges, containers
