

Plant Information

Common Name: Kiwi fruit vine
Scientific Name: Actinidia deliciosa
Plant Type: Vine

Physical Characteristics

Height/Spread: 4-6 meters in height, spread depends on support structure
Growth Rate: Fast
Flower Color(s): Creamy white
Foliage Color(s): Dark green
Bloom Time: Spring

Plant Description

Kiwi, also known as kiwi fruit vine, is a fast-growing vine that produces delicious, nutrient-rich fruit. With its attractive dark green foliage and creamy white flowers in the spring, it adds beauty to any garden or landscape. Kiwi vines require full sun and high watering levels, thriving in well-draining, fertile soil. While moderately low maintenance, they may be vulnerable to certain pests and diseases. Kiwi vines are versatile, serving both as a fruit-bearing plant and a decorative vine, making them a popular choice for gardens. Consider planting them alongside grape vines, climbing roses, or wisteria for a stunning visual display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, fertile soil

Water: High Watering

Hardiness Zone(s): Zone 7-9

Maintenance & Care

Maintenance Level: Moderate
Potential Pests & Diseases: May be susceptible to root rot, vine weevils, and aphids

Additional Information

Special Features: Fruit-bearing vine, attractive foliage
Common Uses: Can be grown for its edible fruit or as a decorative vine

Notes
