

### Plant Information

Common Name: Korean Lilac  
Scientific Name: Syringa meyeri Palibin  
Plant Type: Shrub

### Physical Characteristics

Height/Spread: 1-2 meters in height, 1-2 meters in spread  
Growth Rate: Moderate  
Flower Color(s): Lavender  
Foliage Color(s): Green  
Bloom Time: Spring

### Plant Description

Syringa meyeri Palibin, commonly known as Korean Lilac, is a beautiful shrub that blooms with fragrant lavender flowers in the spring. This compact shrub is low maintenance and perfect for borders or as a specimen plant in gardens. Its attractive foliage and ability to attract butterflies make it a popular choice for landscaping. Korean Lilac prefers well-drained soil and moderate watering, thriving in full sun to part shade conditions. With a moderate growth rate, this shrub is an excellent choice for gardeners looking to add beauty and fragrance to their outdoor spaces.

### Optimal Growing Requirements

Sun: Full sun to part shade

Soil: Well-drained, loamy soil

Water: Moderate watering

Hardiness Zone(s): Zones 3-7

### Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Aphids, powdery mildew

### Additional Information

Special Features: Fragrant flowers, attracts butterflies  
Common Uses: Border plant, specimen plant
