

Plant Information

Common Name: Lilac
Scientific Name: Syringa vulgaris
Plant Type: Shrubs

Physical Characteristics

Height/Spread: 2-7 meters tall, 1.5-4 meters wide
Growth Rate: Moderate
Flower Color(s): Purple, pink, white
Foliage Color(s): Green
Bloom Time: Late spring to early summer

Plant Description

Syringa vulgaris, commonly known as Lilac, is a beautiful shrub that is prized for its fragrant and colorful flowers. With a moderate growth rate, this shrub can reach heights of 2-7 meters and spread 1.5-4 meters wide. Lilacs bloom in late spring to early summer, with flowers in shades of purple, pink, or white. They thrive in full sun and moderate watering, preferring well-drained, fertile soil. This low-maintenance plant is a great addition to any garden or landscape, attracting pollinators with its fragrant blooms. Consider planting Lilac alongside roses, peonies, or hydrangeas for a stunning floral display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 2-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Powdery mildew, leaf spot, lilac borer

Additional Information

Special Features: Fragrant flowers, attracts butterflies and bees
Common Uses: Border plant, fragrant cut flowers
