

Plant Information

Common Name: Manchurian Fire Pieris
Scientific Name: Pieris japonica 'Manchurian Fire'
Plant Type: Shrub

Physical Characteristics

Height/Spread: 1-2 meters tall, 1-1.5 meters wide
Growth Rate: Slow
Flower Color(s): White
Foliage Color(s): Red in spring, turning to dark green in summer
Bloom Time: Early spring

Plant Description

Pieris Manchurian Fire is a stunning evergreen shrub prized for its showy red new growth in spring, which matures to deep green. Its elegant white flowers bloom in early spring, attracting beneficial pollinators. This slow-growing shrub is ideal for shady gardens or as an accent plant in borders. With moderate watering needs and low maintenance requirements, Pieris Manchurian Fire is a popular choice for landscaping in Canadian gardens. Pair it with other acid-loving plants like rhododendrons and azaleas for a harmonious and visually appealing design.

Optimal Growing Requirements

Sun: Part Shade

Soil: Well-drained acidic soil

Water: Moderate Watering

Hardiness Zone(s): Zone 5-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to lacebugs and powdery mildew

Additional Information

Special Features: Evergreen foliage, attracts bees and butterflies
Common Uses: Border plant, foundation planting
