

Plant Information

Common Name: Mariesii Viburnum
Scientific Name: Viburnum plicatum Mariesii
Plant Type: Shrub

Physical Characteristics

Height/Spread: 2-3 meters tall, 1.5-2 meters wide
Growth Rate: Moderate
Flower Color(s): White
Foliage Color(s): Green, turning purplish-red in fall
Bloom Time: Spring

Plant Description

Viburnum plicatum Mariesii, commonly known as Mariesii Viburnum, is a stunning deciduous shrub with tiered branches that bloom with delicate white flowers in spring. The green leaves turn a beautiful purplish-red in the fall, adding interest to the landscape. This low-maintenance plant thrives in well-drained, fertile soil and is suitable for borders or as a specimen plant. Its unique multi-tiered form makes it a standout in any garden setting. Mariesii Viburnum is a perfect choice for adding height and interest to your garden while attracting pollinators with its fragrant flowers.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 4-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Aphids, scale insects, powdery mildew

Additional Information

Special Features: Multi-tiered horizontal branches
Common Uses: Border plant, specimen plant

Notes
