

Plant Information

Common Name: Myrtle Spurge
Scientific Name: Euphorbia myrsinites
Plant Type: Perennial

Physical Characteristics

Height/Spread: 30-40 cm tall, 60-80 cm wide
Growth Rate: Moderate
Flower Color(s): Yellow-green
Foliage Color(s): Blue-green
Bloom Time: Spring

Plant Description

Euphorbia myrsinites, commonly known as Myrtle Spurge, is a low-maintenance perennial plant with striking blue-green foliage and clusters of unique yellow-green flowers in spring. This drought-tolerant plant is ideal for rock gardens, borders, or xeriscaping projects, adding texture and color to the landscape. Its ability to thrive in poor soil and resist deer make it a popular choice for gardeners looking for a fuss-free plant with a long blooming season. Pairing well with other sun-loving companions like Sedum and Lavender, Euphorbia myrsinites is a versatile and attractive addition to any garden.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, sandy soil

Water: Low watering

Hardiness Zone(s): Zones 3-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Generally pest and disease-free

Additional Information

Special Features: Drought-tolerant, deer-resistant
Common Uses: Ground cover, rock gardens, xeriscaping
