

## Plant Information

Common Name: Pepper  
Scientific Name: *Capsicum annuum*  
Plant Type: Annuals

## Physical Characteristics

Height/Spread: 0.3-1.2 meters tall, 0.3-0.6 meters spread  
Growth Rate: Moderate  
Flower Color(s): White  
Foliage Color(s): Green  
Bloom Time: Summer

## Plant Description

Peppers are versatile plants that can be grown for their edible fruits or as ornamental additions to your garden. With moderate growth rate and moderate watering needs, they thrive in full sun and well-drained soil. Their white flowers bloom in the summer, giving way to green foliage and eventually edible peppers rich in nutrients. While they may attract pests like aphids, pepper plants can be an exciting addition to your garden with their unique look and taste. Consider planting them alongside basil, marigolds, or tomatoes for a visually appealing and fruitful garden display.

## Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zone 4-9

## Maintenance & Care

Maintenance Level: Moderate  
Potential Pests & Diseases: Aphids, spider mites, bacterial spot

## Additional Information

Special Features: Edible fruits, rich in vitamin C and antioxidants  
Common Uses: Edible garden plant, ornamental in containers or beds
