

Plant Information

Common Name: Queen of the Prairie
Scientific Name: Filipendula rubra Venusta
Plant Type: Perennial

Physical Characteristics

Height/Spread: 1-1.5 meters tall and 0.5-1 meter wide
Growth Rate: Moderate
Flower Color(s): Pink
Foliage Color(s): Green
Bloom Time: Late Spring to Early Summer

Plant Description

Filipendula rubra Venusta, commonly known as Queen of the Prairie, is a beautiful perennial plant with pink flowers that bloom in late spring to early summer. It thrives in moist, well-drained soil and attracts pollinators to the garden. With its moderate growth rate and low maintenance level, it is an excellent choice for borders or cottage gardens. Pair it with companions like Astilbe, Hosta, and Japanese Iris to create a stunning and vibrant landscape in your garden.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Moist, well-drained soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Aphids, powdery mildew

Additional Information

Special Features: Attracts pollinators
Common Uses: Borders, cottage gardens

Notes
