

Plant Information

Common Name: Rhododendron Nova Zembla
Scientific Name: Rhododendron 'Nova Zembla'
Plant Type: Shrub

Physical Characteristics

Height/Spread: 2-3 meters tall, 1.5-2 meters wide
Growth Rate: Moderate
Flower Color(s): Bright red
Foliage Color(s): Dark green
Bloom Time: Late Spring to Early Summer

Plant Description

Rhododendron Nova Zembla is a stunning evergreen shrub known for its vibrant red flowers that bloom in late spring to early summer. This moderate-growing plant thrives in acidic, well-draining soil and can tolerate part shade to full sun. Its dark green foliage provides a beautiful backdrop for the bright blooms, making it a popular choice for landscaping as a specimen or border plant. With its cold hardiness and low maintenance requirements, Rhodo Nova Zembla is a fantastic addition to any garden, attracting attention with its showy flowers and adding a pop of color to the landscape.

Optimal Growing Requirements

Sun: Part Shade to Full Sun

Soil: Well-draining acidic soil

Water: Moderate Watering

Hardiness Zone(s): Zones 4-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to lace bugs and root rot

Additional Information

Special Features: Cold hardy, showy flowers
Common Uses: Specimen plant, border plant
