

## Plant Information

Common Name: Rose of Sharon  
Scientific Name: Hibiscus syriacus 'Hamabo'  
Plant Type: Shrub

## Physical Characteristics

Height/Spread: 2-3 meters tall and 1-1.5 meters wide  
Growth Rate: Moderate  
Flower Color(s): Light pink with a dark red center  
Foliage Color(s): Green  
Bloom Time: Summer to early fall

## Plant Description

Hibiscus s Hamabo, also known as Rose of Sharon, is a beautiful shrub that adds charm to any garden with its light pink flowers and green foliage. This moderate-growing shrub blooms from summer to early fall, attracting butterflies with its unique coloration. With a low maintenance level and drought tolerance, Hibiscus s Hamabo is a great choice for hedging, borders, or as a standalone specimen plant. Pair it with butterfly bush, Russian sage, or daylilies for a stunning garden display that will thrive in Canadian weather conditions.

## Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, loamy soil

Water: Moderate Watering

Hardiness Zone(s): Zone 5-9

## Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Aphids, spider mites, leaf spot

## Additional Information

Special Features: Drought-tolerant, attracts butterflies  
Common Uses: Hedge, border plant, specimen plant
