

Plant Information

Common Name: Royal City Rhododendron
Scientific Name: Rhododendron 'Royal City'
Plant Type: Shrubs

Physical Characteristics

Height/Spread: 2 meters tall and 1.5 meters wide
Growth Rate: Moderate
Flower Color(s): Pink
Foliage Color(s): Dark green
Bloom Time: Spring

Plant Description

Royal City Rhododendron is a stunning shrub with pink blooms that add a pop of color to the spring garden. Its dark green foliage provides a beautiful backdrop for the vibrant flowers. This shrub is relatively low maintenance and can thrive in partially shaded areas with moderate watering. Its drought-tolerant nature makes it a great addition to any landscape design, especially when planted alongside other acid-loving plants like Azaleas and Japanese Maple trees. The Royal City Rhododendron is a versatile and visually appealing choice for gardeners looking to enhance their outdoor space.

Optimal Growing Requirements

Sun: Part Shade

Water: Moderate Watering

Soil: Acidic, well-draining soil

Hardiness Zone(s): Zone 4-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Potential pests include aphids and spider mites, susceptible to root rot in wet conditions

Additional Information

Special Features: Drought-tolerant once established
Common Uses: Ideal as a border plant or in mixed shrub borders
