Plant Description

Magnolia Royal Star, also known as Royal Star Magnolia, is a stunning tree with white, fragrant flowers that bloom in spring. This slow-growing tree thrives in well-drained, acidic soil and prefers full sun to partial shade. With its green foliage and attractive form, it makes a beautiful accent plant in gardens and landscapes. Magnolia Royal Star is low maintenance and has special features like attracting pollinators. It pairs well with companion plants like Rhododendrons, azaleas, and hostas, adding elegance and fragrance to any outdoor space.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, acidic soil

Water: Moderate Watering

Hardiness Zone(s): Zones 4-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to scale insects and leaf spot

Additional Information

Special Features: Fragrant flowers, attracts pollinators
Common Uses: Accent tree, specimen plant
