

Plant Information

Common Name: Rugosa Rose
Scientific Name: Rosa rugosa
Plant Type: Shrub

Physical Characteristics

Height/Spread: 1-2 meters tall and wide
Growth Rate: Moderate
Flower Color(s): Pink, white, or red
Foliage Color(s): Dark green
Bloom Time: Summer

Plant Description

Rosa Rugosa, also known as the Rugosa Rose, is a tough and vigorous shrub that thrives in a wide range of environmental conditions. Its fragrant flowers come in shades of pink, white, or red and bloom profusely in the summer months. With its dark green foliage and attractive hips in the fall, this plant adds beauty to any landscape. Besides being drought and salt-tolerant, it also attracts pollinators and is low maintenance, making it a popular choice for seaside gardens, hedges, or erosion control. Pair it with companion plants like Lavender or Salvia for a stunning garden display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, loamy soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Aphids, Japanese beetles, powdery mildew

Additional Information

Special Features: Drought-tolerant, salt-tolerant, fragrant flowers, attracts pollinators
Common Uses: Hedge plant, seaside gardens, erosion control
