

Plant Information

Common Name: Siberian Iris
Scientific Name: *Iris sibirica*
Plant Type: Perennials

Physical Characteristics

Height/Spread: 60-90 cm tall and 30-45 cm wide
Growth Rate: Moderate
Flower Color(s): Various shades of blue, purple, white, and yellow
Foliage Color(s): Green
Bloom Time: Late Spring to early Summer

Plant Description

Siberian Iris, scientifically known as *Iris sibirica*, is a stunning perennial plant that produces an array of colorful flowers in late Spring to early Summer. With its moderate growth rate and low maintenance requirements, this iris is a popular choice for landscaping and gardening. It thrives in moist, well-drained soil and is tolerant of wet conditions, making it a versatile addition to any garden. Not only does it attract butterflies with its vibrant blooms, but it is also deer resistant. Consider planting Siberian Iris alongside daylilies, catmint, or peonies for a beautiful and harmonious garden display.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Moist, well-drained soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Deer resistant, susceptible to iris borer and slugs

Additional Information

Special Features: Tolerant of wet soil, attractive to butterflies
Common Uses: Borders, containers, mass plantings
