

Plant Information

Common Name: Snow-on-the-Mountain
Scientific Name: *Aegopodium podagraria Variegatum*
Plant Type: Ground Cover

Physical Characteristics

Height/Spread: 0.2-0.3 meters tall, spreading up to 1 meter
Growth Rate: Fast
Flower Color(s): White
Foliage Color(s): Variegated green and white
Bloom Time: Late Spring to Early Summer

Plant Description

Aegopodium podagraria Variegatum, commonly known as Snow-on-the-Mountain, is a fast-growing ground cover plant with attractive variegated foliage. It features green leaves edged in white and produces small white flowers in late spring to early summer. This plant is low-maintenance, deer-resistant, and drought-tolerant, making it an excellent choice for shady areas in the garden. Snow-on-the-Mountain is ideal for ground cover or borders and can be paired with companion plants like hostas, ferns, and coral bells to create a visually appealing landscape. Its invasive nature should be monitored in some regions.

Optimal Growing Requirements

Sun: Part Shade to Full Shade

Soil: Well-draining, fertile soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-7

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Can be invasive in some areas

Additional Information

Special Features: Deer resistant, drought-tolerant
Common Uses: Ground cover, border plant
