

## Plant Information

Common Name: Snow in Summer  
Scientific Name: *Cerastium tomentosum*  
Plant Type: Perennials

## Physical Characteristics

Height/Spread: 0.1-0.3 meters tall, spreading up to 0.6 meters  
Growth Rate: Moderate  
Flower Color(s): White  
Foliage Color(s): Gray-green  
Bloom Time: Late Spring to Early Summer

## Plant Description

*Cerastium tomentosum*, commonly known as Snow in Summer, is a low-growing perennial that produces a stunning display of white flowers in late spring to early summer. With its attractive gray-green foliage, this plant is perfect for adding contrast to rock gardens, borders, or pathways. Snow in Summer is drought-tolerant and low-maintenance, making it a popular choice for gardeners looking to add a touch of elegance to their landscaping. This plant thrives in full sun and well-drained soil, making it an excellent choice for Canadian gardens in Zones 3-7. Consider planting with companions like Sedum or Lavender for a beautiful, cohesive garden design.

## Optimal Growing Requirements

Sun: Full Sun

Soil: Well-drained, sandy soil

Water: Low Watering

Hardiness Zone(s): Zones 3-7

## Maintenance & Care

Maintenance Level: Low  
Potential Pests & Diseases: Generally pest and disease resistant

## Additional Information

Special Features: Drought-tolerant, silver-gray foliage  
Common Uses: Ground cover, rock gardens, borders
