

Plant Information

Common Name: Spirea Graciosa garland
Scientific Name: Spiraea japonica 'Graciosa'
Plant Type: Shrub

Physical Characteristics

Height/Spread: 50-60 cm height, 60-75 cm spread
Growth Rate: Moderate
Flower Color(s): Pink
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Spirea Graciosa garland is a compact deciduous shrub that produces an abundance of pink flowers in the summer months. Its green foliage provides a beautiful backdrop for the colorful blooms, making it a popular choice for borders and mass plantings in gardens. This low-maintenance plant is deer resistant and attracts butterflies, adding charm and life to any outdoor space. With moderate water needs and a preference for well-drained soil, Spirea Graciosa garland thrives in full sun to part shade conditions. Consider planting alongside lavender, geranium, or salvia for a stunning garden display.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, Loamy soil

Water: Moderate Watering

Hardiness Zone(s): Zones 3-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to aphids and spider mites

Additional Information

Special Features: Attracts butterflies, deer resistant
Common Uses: Border plant, mass planting
