

Plant Information

Common Name: Tickseed
Scientific Name: Coreopsis 'Jethro Tull'
Plant Type: Perennial

Physical Characteristics

Height/Spread: 30-60 cm in height, 30-60 cm in spread
Growth Rate: Moderate
Flower Color(s): Yellow with burgundy centers
Foliage Color(s): Green
Bloom Time: Summer

Plant Description

Coreopsis 'Jethro Tull' is a beautiful perennial plant that adds a pop of color to any garden with its bright yellow flowers and burgundy centers. It blooms in the summer months and is easy to care for, making it a perfect choice for beginners or busy gardeners. This variety of Tickseed is drought-tolerant and attracts butterflies, adding life and movement to your outdoor space. Plant it in well-draining soil and in full sun for the best results. Pair it with plants like Salvia or black-eyed susan for a stunning garden display.

Optimal Growing Requirements

Sun: Full Sun

Soil: Well-draining, fertile soil

Water: Low to Moderate Watering

Hardiness Zone(s): Zones 3-9

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Susceptible to aphids, powdery mildew

Additional Information

Special Features: Drought-tolerant, attracts butterflies
Common Uses: Border plant, container plant
