

Plant Information

Common Name: Valentine Bleeding Heart
Scientific Name: *Dicentra s Valentine* Hordival
Plant Type: Perennials

Physical Characteristics

Height/Spread: 30-45 cm height, 30-45 cm spread
Growth Rate: Moderate
Flower Color(s): Red
Foliage Color(s): Green
Bloom Time: Spring

Plant Description

Dicentra s Valentine Hordival, commonly known as Valentine Bleeding Heart, is a charming perennial plant with red heart-shaped flowers that bloom in spring. This moderate-growing plant thrives in part shade and requires moderate watering. With green foliage and a low maintenance level, it is perfect for border planting and woodland gardens. Its special features include being deer-resistant and attracting hummingbirds. In Canadian hardiness zones 3-5, this plant is a stunning addition to any garden, especially when paired with companion plants like hostas, ferns, and astilbe.

Optimal Growing Requirements

Sun: Part Shade

Soil: Loamy

Water: Moderate Watering

Hardiness Zone(s): Zone 3-5

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: Slugs, aphids, powdery mildew

Additional Information

Special Features: Deer-resistant, attracts hummingbirds
Common Uses: Border plant, woodland gardens
