

Plant Information

Common Name: Weeping Alaska Cedar
Scientific Name: *Chamaecyparis nootkatensis* Pendula
Plant Type: Tree

Physical Characteristics

Height/Spread: 4-10 meters in height, 1.5-3 meters in spread
Growth Rate: Slow
Flower Color(s): Insignificant
Foliage Color(s): Blue-green
Bloom Time: Non-flowering

Plant Description

Chamaecyparis nootkatensis Pendula, commonly known as Weeping Alaska Cedar, is a slow-growing tree with graceful pendulous branches that add an elegant touch to any landscape. Its attractive blue-green foliage and unique form make it a standout feature in gardens. This low-maintenance tree is drought-tolerant and deer-resistant, making it ideal for beginners or busy gardeners. While it may be susceptible to pests like spider mites and diseases like root rot, proper care and maintenance can help prevent these issues. Plant Weeping Alaska Cedar as a specimen tree or use it as an accent plant to enhance the beauty of your outdoor space.

Optimal Growing Requirements

Sun: Full Sun to Part Shade

Soil: Well-drained, acidic soils

Water: Moderate Watering

Hardiness Zone(s): Zones 4-8

Maintenance & Care

Maintenance Level: Low
Potential Pests & Diseases: susceptible to spider mites and root rot

Additional Information

Special Features: Drought-tolerant, deer-resistant
Common Uses: Specimen tree, accent plant
